International Journal of Ayurveda360

Template for Discussion Kernel Articles

Discussion Kernel articles are short, thought-provoking pieces that address issues of wide potential interest, aiming to stimulate further discussion and debate. Manuscripts should be approximately 1500 words (excluding references) and may include up to 20 references and 3 non-text items (tables/figures). A non-structured abstract of up to 200 words is required.

Title of the Discussion Concise, engaging, and informative (≤15 words) Font: Times New Roman, 14 pt, Bold, Centered Author(s) Details

First Name Last Name1, First Name Last Name2, etc. 1Designation, Institution, City, Country 2Designation, Institution, City, Country

Abstract (Non-Structured)

Word limit: Up to 200 words

A concise summary of the discussion topic, highlighting its relevance, key arguments, and potential implications.

Keywords

4 to 6 keywords separated by commas (Use MeSH terms if possible)

Main Text

Word Limit: 1500 words

1. Introduction

- Background and importance of the topic
- Relevance in Ayurveda or Integrative Medicine
- Objective of the discussion

2. Core Arguments

- Presentation of key viewpoints
- Summary of different perspectives on the issue
- Supporting evidence or counterarguments

3. Implications & Future Considerations

- Potential impact on research, policy, or clinical practice
- Areas requiring further debate or exploration
- Recommendations for future discourse

4. Conclusion

- Summary of key discussion points
- Importance of continued dialogue on the topic

• Final remarks

References

- Limit: Up to 20 references
- Reference numbers should be written inside square brackets [] within the text and NOT as superscripts or endnotes

Example: The role of Ayurveda in modern healthcare has been widely debated [1].

Tables & Figures

- Maximum 3 non-text items (tables/figures)
- Figures should be high-quality (300 dpi minimum)
- Tables should summarize key arguments or supporting data

Acknowledgments (Optional)

• Recognize contributors, funding, or institutional support (if applicable)

Conflict of Interest Statement

Example: The author(s) declare no conflicts of interest.

Optional: Author Bio

• A short paragraph about the author(s), including expertise and current affiliations.

References

References should be numbered consecutively in the order they are first mentioned in the text, tables, and legends. They should be identified by **numerals in square brackets [] after punctuation marks**. References cited only in tables or figure legends should be numbered according to the sequence established by their first identification in the text of the particular table or figure. Ensure adherence to the style examples below, based on formats used by NLM in Index Medicus. Journal titles should be abbreviated according to Index Medicus style; provide complete names for non-indexed journals. Avoid citing abstracts unless necessary, and ensure permissions for unpublished data.

Articles in Journals

Standard Journal Article (for up to six authors):

Parija SC, Ravinder PT, Shariff M. Detection of hydatid antigen in the fluid samples from hydatid cysts by co-agglutination. *Trans R Soc Trop Med Hyg.* 1996;90:255–256.

Standard Journal Article (for more than six authors):

Roddy P, Goiri J, Flevaud L, et al. Field Evaluation of a Rapid Immunochromatographic Assay for Detection of *Trypanosoma cruzi* Infection by Use of Whole Blood. *J Clin Microbiol*. 2008;46:2022-2027.

Volume with Supplement:

Otranto D, Capelli G, Genchi C. Changing distribution patterns of canine vectorborne diseases in Italy: leishmaniosis vs. dirofilariosis. *Parasites & Vectors*. 2009;Suppl 1.
