 - **Perspectives on current research gaps or future directions**
 - **Critical reflections on policies, practices, or methodologies**
-

3. Conclusion

- **Summary of key points**
 - **Recommendations or call to action**
 - **Final thoughts from the editorial perspective**
-

References

- **Limit: Up to 15 references**
- **Reference numbers should be written inside square brackets [] within the text and NOT as superscripts or endnotes**

Example: The integration of Ayurveda with modern medicine has shown significant potential [1].

Downloaded from www.ayurveda360.in

Acknowledgments (Optional)

- **Recognize contributors, funding, or institutional support (if applicable)**
-

Conflict of Interest Statement

Example: *The author(s) declare no conflicts of interest.*

Optional: Author Bio

- A short paragraph about the author(s), including expertise and current affiliations.
-

References

References should be numbered consecutively in the order they are first mentioned in the text, tables, and legends. They should be identified by **numerals in square brackets [] after punctuation marks**. References cited only in tables or figure legends should be numbered according to the sequence established by their first identification in the text of the particular table or figure. Ensure adherence to the style examples below, based on formats used by NLM in Index Medicus. Journal titles should be abbreviated according to Index Medicus style; provide complete names for non-indexed journals. Avoid citing abstracts unless necessary, and ensure permissions for unpublished data.

Articles in Journals

Standard Journal Article (for up to six authors):

Parija SC, Ravinder PT, Shariff M. Detection of hydatid antigen in the fluid samples from hydatid cysts by co-agglutination. *Trans R Soc Trop Med Hyg.* 1996;90:255–256.
