Abstract (Non-Structured)

Word limit: Up to 250 words

A concise summary of the short communication, highlighting the key findings or observations. No subheadings required.

Keywords

4 to 6 keywords separated by commas (Use MeSH terms if possible)

Main Text

Word Limit: 1500 words

1. Introduction

- **Brief background and relevance of the study**
 - **Objectives and significance of the study**
-

2. Methods

- **Brief description of methodology (if applicable)**
 - **Sample, setting, and key procedures**
 - **Data analysis (if relevant)**
-

3. Results & Discussion

- **Key findings or observations**
 - **Brief interpretation and comparison with existing literature**
 - **Implications for future research or practice**
-

4. Conclusion

- **Summary of findings**
 - **Relevance and potential impact**
-

References

- **Limit:** Up to 20 references
- **Reference numbers** should be written inside square brackets [] within the text and **NOT** as superscripts or endnotes

Example: Short communications have been widely utilized in medical literature to present novel observations [1].

Tables & Figures

- **Maximum 2 non-text items (tables/figures)**
- **Figures should be high-quality (300 dpi minimum)**
- **Tables should be formatted according to journal guidelines**

Acknowledgments (Optional)

- **Recognize contributors, funding, or institutional support (if applicable)**

Conflict of Interest Statement

Example: The author(s) declare no conflicts of interest.

Optional: Author Bio

- **A short paragraph about the author(s), including expertise and current affiliations.**

References

References should be numbered consecutively in the order they are first mentioned in the text, tables, and legends. They should be identified by **numerals in square**

brackets [] after punctuation marks. References cited only in tables or figure legends should be numbered according to the sequence established by their first identification in the text of the particular table or figure. Ensure adherence to the style examples below, based on formats used by NLM in Index Medicus. Journal titles should be abbreviated according to Index Medicus style; provide complete names for non-indexed journals. Avoid citing abstracts unless necessary, and ensure permissions for unpublished data.
